Worldwide Service

Designed by Luma Tech

Built by LOMO

Lomo Illumina are new and innovative cine lenses. They consist of high quality optics which would compare to some of the best, and most expensive, in the industry. They have an ultra-fast aperture of T1.3, yet they remain affordable to professional cinematographers.

Luma Tech takes great pride in offering some of the finest optics and accessories for digital and film production. We have created, and developed, Illumina cinema lenses and the LumaCon Linear Collimator.

Everything you purchase from Luma Tech, or our worldwide dealer network, is backed by our money back guarantee and warranty. Our products are professional grade, made specifically for the film industry. We develop products that are high performance and reliable.
